

Project Assignment

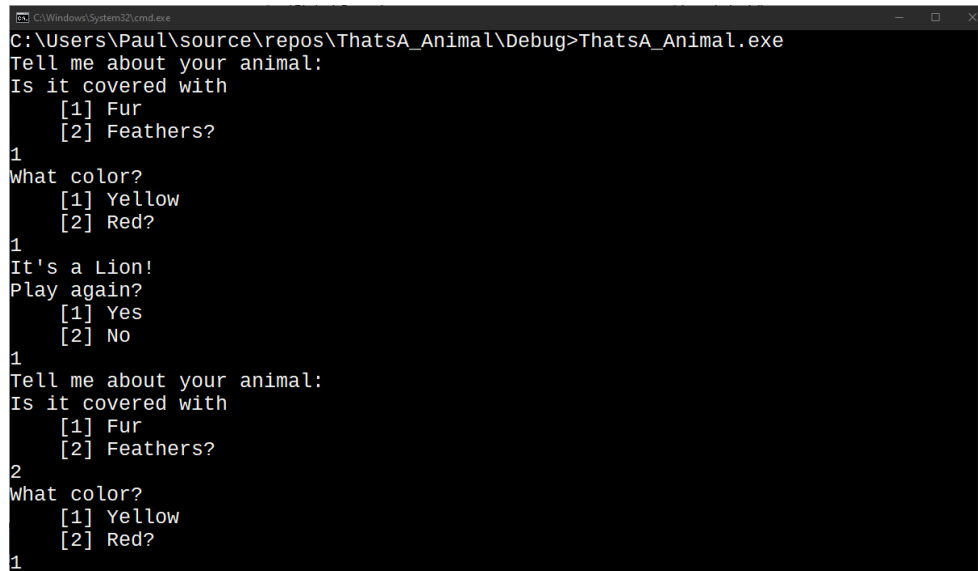

Module: Selection Statements

Title: Animal Identifier

Description:

This program will guess what animal you are thinking of, if you just answer a few questions. The command-line interface will display lists of choices. You select each choice one by entering a number.

Here's an example:

```
C:\Windows\System32\cmd.exe
C:\Users\Paul\source\repos\ThatsA_Animal\Debug>ThatsA_Animal.exe
Tell me about your animal:
Is it covered with
    [1] Fur
    [2] Feathers?
1
what color?
    [1] Yellow
    [2] Red?
1
It's a Lion!
Play again?
    [1] Yes
    [2] No
1
Tell me about your animal:
Is it covered with
    [1] Fur
    [2] Feathers?
2
what color?
    [1] Yellow
    [2] Red?
1
```

Instructions:

Write a program that produces output similar to the one shown above. You'll have to think of animals to match the descriptions!

Bonus:

How far can you take this?
